

Navdeep Raushan

Full-Stack Software Engineer

hello@navdeepraushan.in | linkedin.com/in/navdeep-raushan-656895157 | github.com/Navdeep434

SUMMARY

Full-stack engineer with 3 years of experience working across Java/Spring Boot, Next.js/TypeScript, and Laravel. I design robust REST APIs, ship polished, reactive frontends, and connect the two with clean, maintainable code across the full delivery lifecycle.

SKILLS

Backend: Java, Spring Boot, Laravel, PHP, REST APIs

Frontend: Next.js, React, TypeScript, Tailwind CSS

Database: SQL Server, MySQL

Tools: Git, Docker, Postman, CI/CD

EXPERIENCE

Software Engineer - Company Name 2025 - Present

- Designed and shipped REST APIs in Spring Boot serving production traffic across multiple client applications.
- Built full-stack features end-to-end with Next.js/TypeScript on the frontend and Java or Laravel on the backend.
- Optimized SQL Server queries and schema design, reducing average response times on key endpoints.

Backend Developer - Previous Company 2024 - 2025

- Maintained and extended Laravel MVC applications, including auth, billing, and admin tooling.
- Collaborated with frontend engineers to define clean API contracts and reduce integration bugs.
- Introduced CI/CD pipelines that cut deployment time and manual QA overhead.

Junior Developer - First Company 2023 - 2024

- Contributed to internal tools using PHP and MySQL.
- Picked up Java and Spring fundamentals while assisting on a backend migration project.
- Wrote unit and integration tests to improve coverage on legacy modules.

PROJECTS

Project One

Spring Boot + Next.js inventory platform with a real-time dashboard. (Java, Spring Boot, Next.js, SQL Server)

Project Two

Laravel admin platform with role-based access control and background jobs. (Laravel, PHP, MySQL, Tailwind)

Project Three

TypeScript microservices with automated testing and a CI/CD pipeline. (TypeScript, Node.js, Docker, CI/CD)

Project Four

React + Java internal analytics and reporting tool. (React, Java, REST APIs)
